There are many speakers lines on the market today and a lot less dealers than a few years ago. So when we decided to make a change in speaker lines, there were a lot of people at the door looking for a dealer.

We don't make fast decisions and we talked with a number of companies on our 'short list' of vendors. Paradigm offered an unbeatable combination of product performance and price that just was better than anyone else. From the Monitor series to the Reference, Paradigm offers exceptional values. See and hear for yourself at Roberts Audio Video. They are on display.

HIGHLIGHTS

- Anthem Room Correction (ARC)
- A very beefy amp – more 'real' power than the competition!
- Dual-processor audio DSP
- Video Conversion from Composite Video and Component Video to HDMI
- Scaling up to 1080p60
- 1080p24 mode
- Dolby Volume
- AM/FM Tuner
- 3D Support via software upgrade

When a receiver is so good that it makes even cheaper speakers sound good, then you have a winner. The new Anthem line of surround sound receivers start at \$1,000. The ARC® room correction does an amazing job of making your room sound like it was designed for listening. I'm not kidding when I say that this receiver will make you believe that you just got all new speakers! This has only been available in \$6,000 + separates before now!

Why we chose Paradigm Speakers

Paradigm®

THE ULTIMATE IN SOUND FOR MUSIC AND HOME THEATER™

Paradigm's Monitor Series, with its proprietary SuperDrive™ technology, combines very high-efficiency with very high output and ultra-low distortion. Monitor speakers compete directly with the efficiency and output of major brands of horn speakers—they not only play as loud, their sound is authentically high-end. Even with moderately powered amplifiers, Monitor speakers deliver truly breathtaking performance. And **\$179 each** in classic Paradigm tradition, unparalleled value too!

FEATURES:

- Advanced High-Efficiency M-ICP™ Minimum-Mass Injection-Molded Co-Polymer Bass/Midrange Cones teamed with advanced motor structures and oversized magnets provide exceptional sensitivity, superb power handling and truly tremendous output.
- Advanced High-Power Carbon-Infused Bass Cones, highly damped and extremely rigid, provide tight, superbly defined and incredibly well-extended bass response.
- Elevated Tweeter and Advanced WaveGuide™ Chassis foster exceptionally uniform response across a wide, deep listening window.
- Low-Diffraction Magnetic Grilles fit like a glove! Perfectly centered over the baffle, when in position these stay-tight grilles won't move 'til you move them. Outrigger Feet on Floorstanding Models give added stability and stylish good looks. Nickel-plated screws add a high-tech touch.
- Advanced H-PTD™ High-Efficiency Pure-Titanium Domes with ferro-fluid cooling encourage a winning combination of dome rigidity and low mass. Harmonics and air possess breathtaking clarity and accuracy. The result is performance that rivals far more expensive high-end speaker designs.
- High-Pressure Die-Cast Aluminum or GRIP™ Glass - Reinforced Injection-Molded Polymer Chassis (varies by model) are exceptionally rigid to eliminate flexing and ringing, while also functioning as heatsinks for greater power handling.

Available in Cherry, Rosenut, Black Ash, White, Wengé
